

## **Lumenis One™**

Lumenis One is a multi-technology, multi-application IPL and laser system, manufactured by Lumenis Ltd.

A versatile, upgradeable platform, it comprises three technologies used for numerous clinical applications.

The three technologies are Intense Pulsed Light (IPL), the Nd:YAG 1064 nm laser, and the LightSheer diode laser.

- Intense Pulsed Light (IPL), Lumenis' propriety technology, is the gold standard for skin treatments using Photorejuvenation.
- The Nd:YAG laser represents the gold standard technology for non-invasive treatment of deeper vascular lesions and leg veins.
- The LightSheer diode laser is the world's most accepted technology for photoepilation.
