

1041S, 1055S and 1080S CO2 Lasers

CHAR-FREE INCISION AND ABLATION

The 40 Watt 1041S model, 55 Watt 1055S model and the 80 Watt 1080S model laser systems feature a precise and consistent control of char-free incision and ablation. Specifically designed with a tall tower and long laser arm for hospital use, high energy pulse mode characteristics provide optimal output for a large assortment of laser accessories.
