

# **UltraPulse® SurgiTouch™**

THE FOREFRONT OF LASER CONTROL AND PERFORMANCE

The new UltraPulse SurgiTouch CO2 laser system incorporates the same short duration, high energy pulsed technology that placed the original UltraPulse CO2 laser at the forefront of laser control and performance. The latest advancements in surgical laser technology are integrated with a breadth of new features, most notably the SurgiTouch user interface automation system. Automatic determination of treatment parameters and selection of accessories for a given application provide convenience and effectiveness for the physician while at the same time optimal results are achieved.
